**JACK BERMAN**  
PRIMARY EXAMINER

The following is an examiner's statement of reasons for allowance: The prior art does not teach to form a sample holder for laser desorption/ionization mass spectrometry by coating a metal plate with a layer of carbon-based material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both Clark et al. and Wood et al. teach to form a sample holder for laser desorption/ionization mass spectrometry by coating a plate with a layer of carbon-based material, but both of these references require that the base plate be non-metallic.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
